

FUSE – Synligare Seminar

III Tool Example - Synligare

May 22 2015

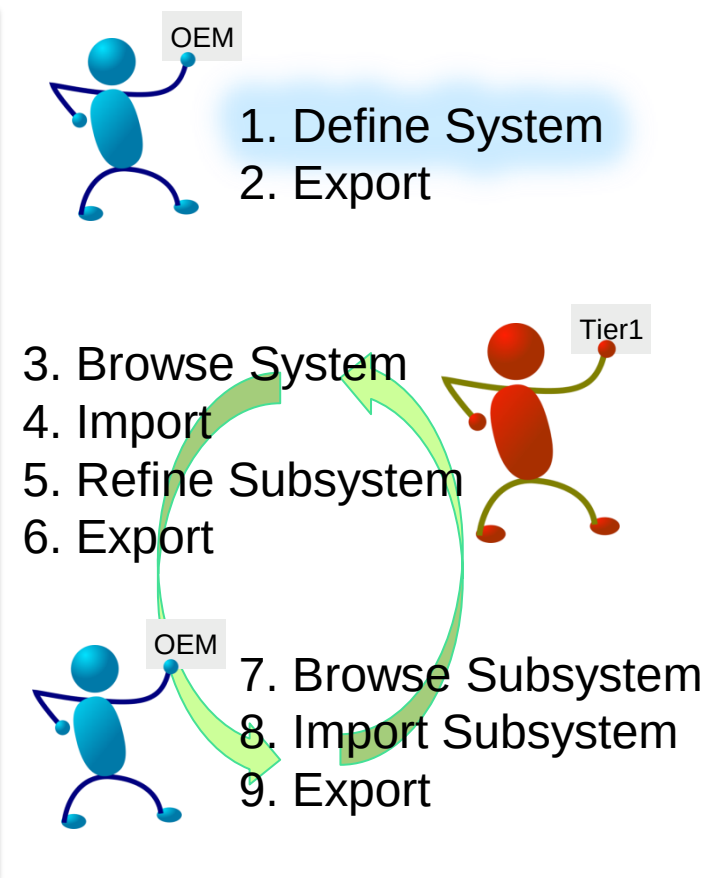

Collaborative Function Development

Role: OEM
Application: SystemWeaver
Content: Initial Specification

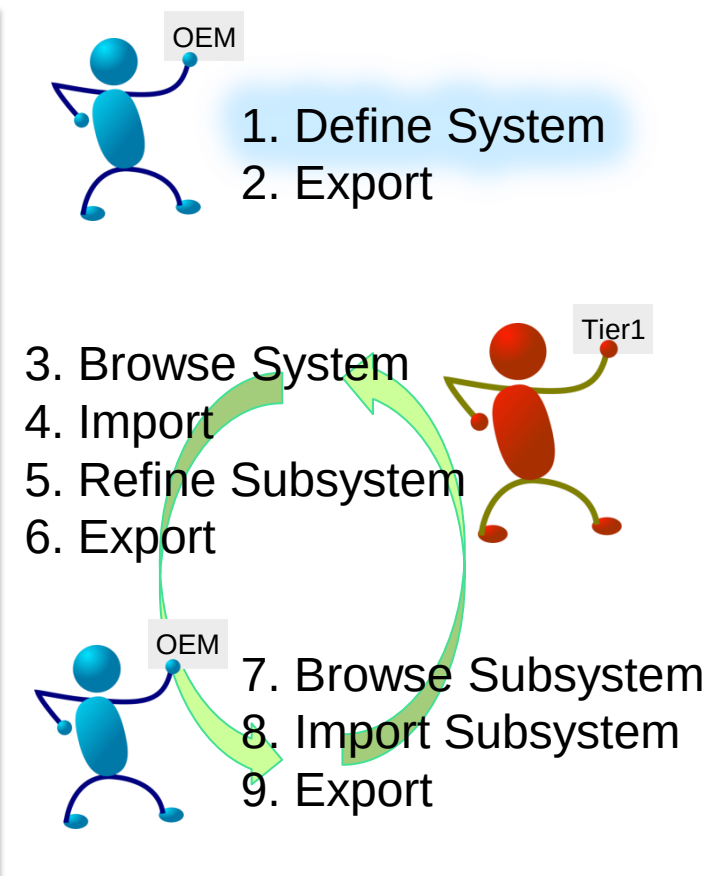

Collaborative Function Development

Role: OEM
Application: SystemWeaver
Content: Initial Specification

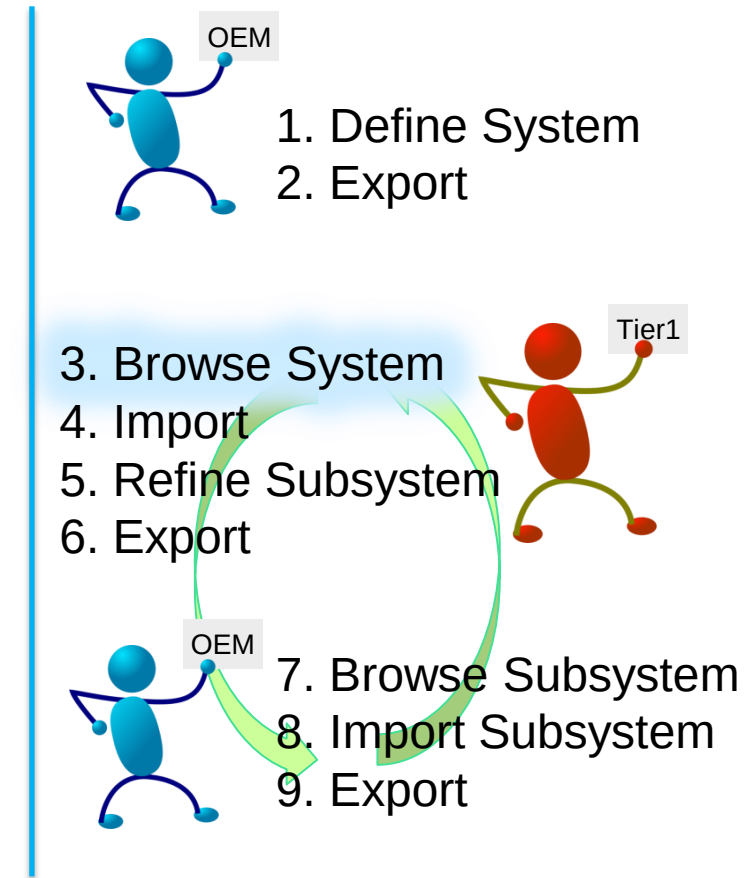

Collaborative Function Development

Role: OEM
Application: SystemWeaver
Content: EAXML Export
sgraphml Export

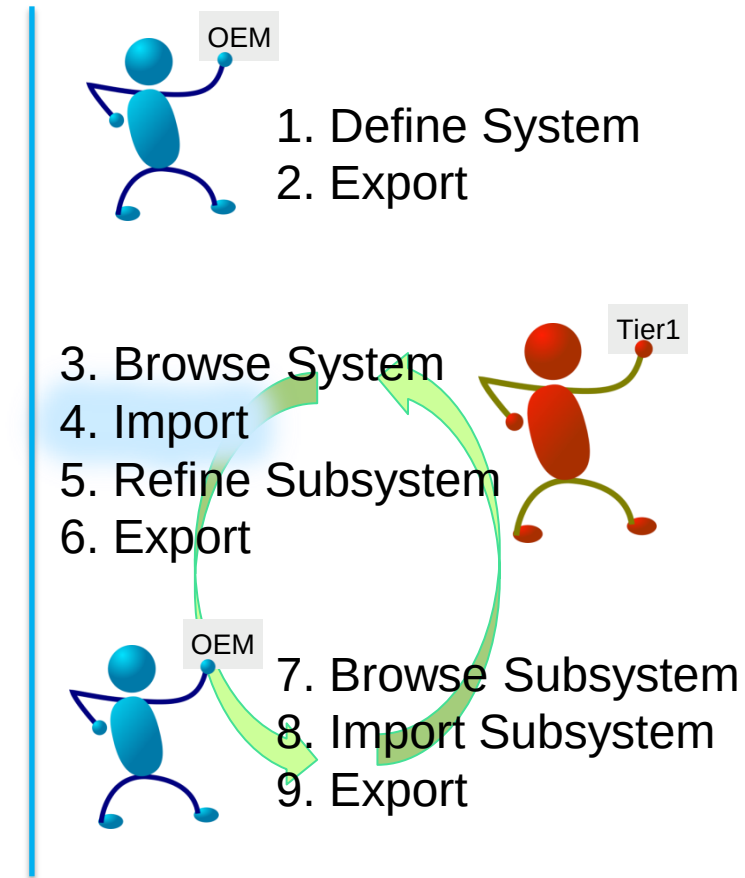

Collaborative Function Development

Role: Tier1
Application: EATOP
Content: Received Specification

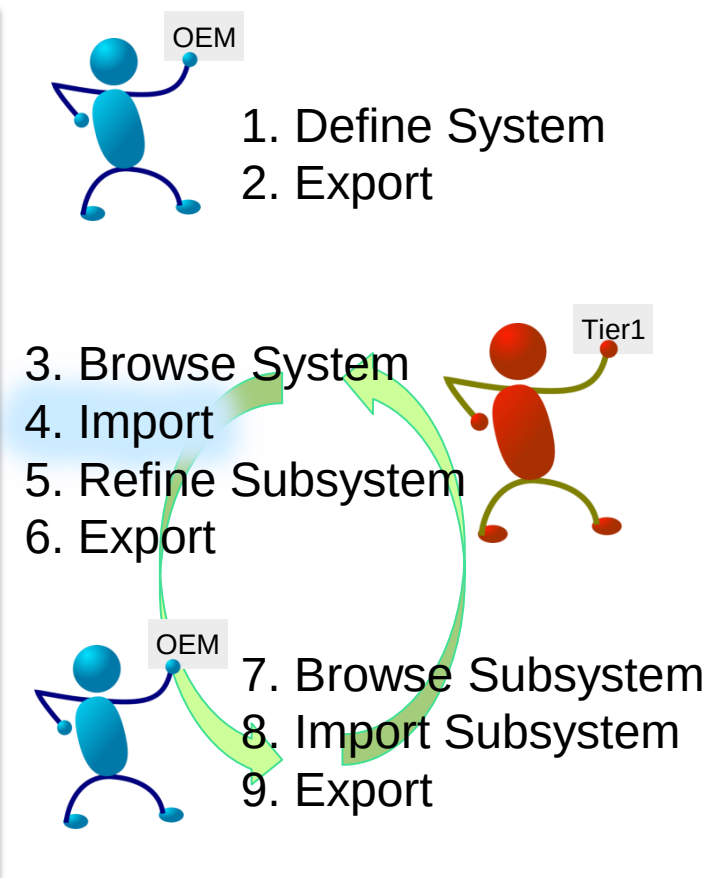

Collaborative Function Development

Role: Tier1
Application: EATOP
Content: Received Specification

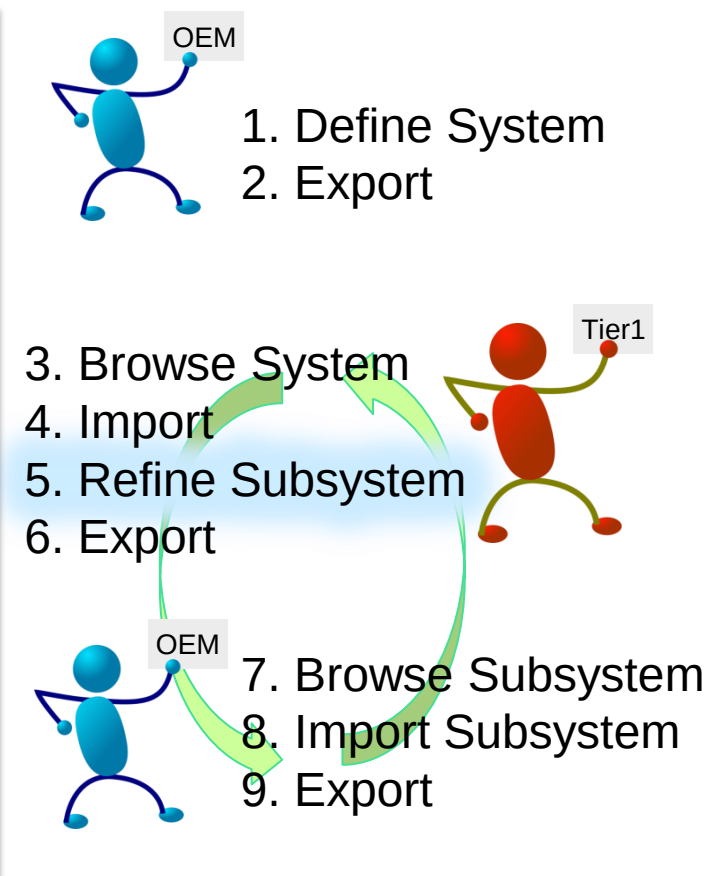

Collaborative Function Development

Role: Tier1
Application: Enterprise Architect
Content: Received Specification

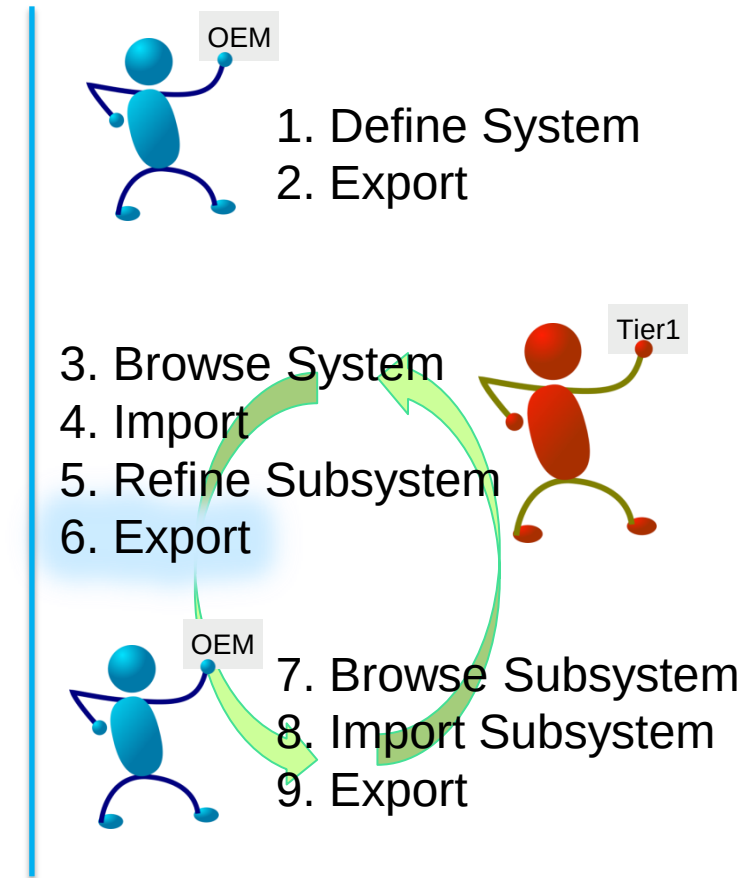

Collaborative Function Development

Role: Tier1
Application: Enterprise Architect
Content: Refined Specification

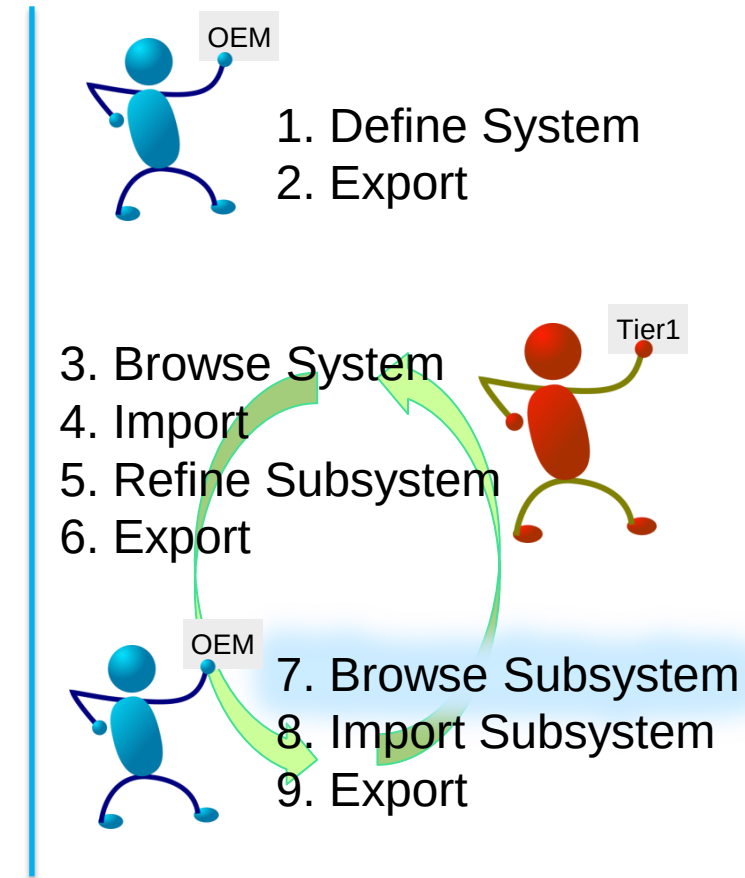

Collaborative Function Development

Role: Tier1
Application: Enterprise Architect
Content: Refined Specification

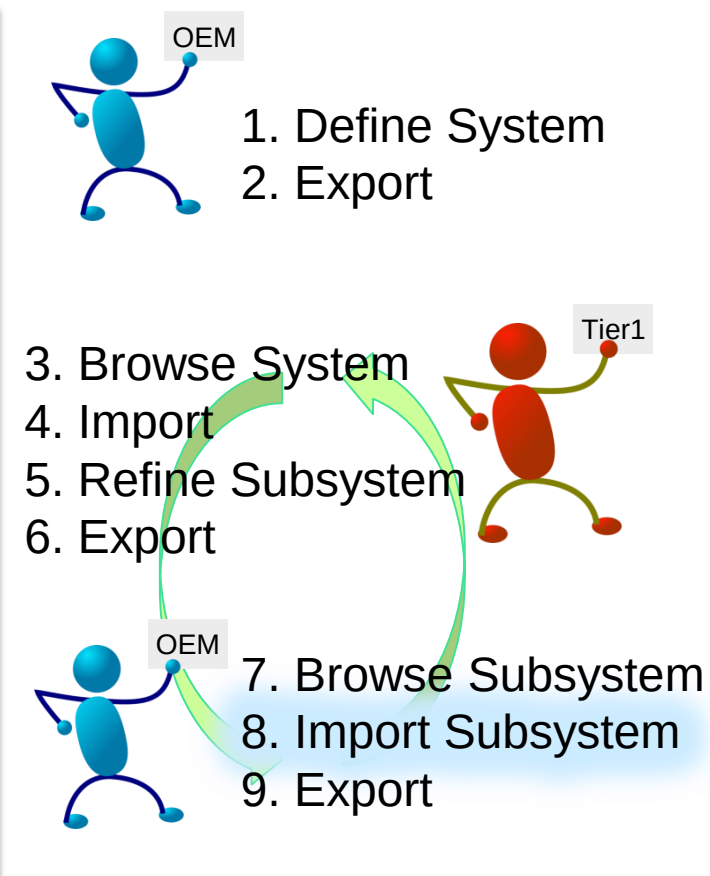

Collaborative Function Development

Role: OEM
Application: EATOP
Content: Refined Specification

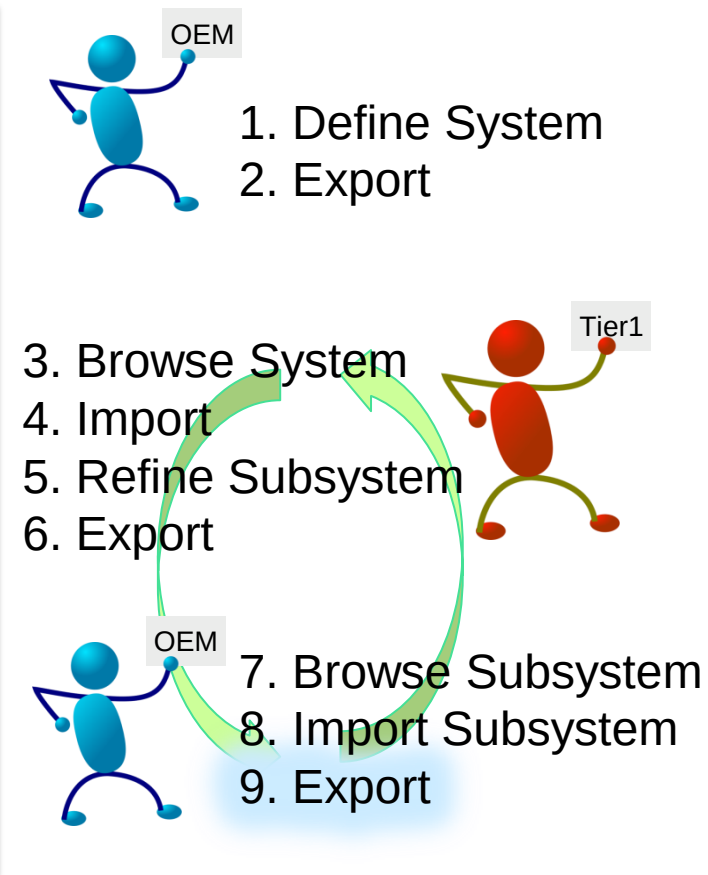

Collaborative Function Development

Role: OEM
Application: SystemWeaver
Content: Refined Specification

Collaborative Function Development

Role: OEM
Application: SystemWeaver
Content: Refined Specification

Collaborative Dependability

Role: OEM
Application: EATOP
Content: Vehicle Level Information

1. Perform HARA

Hazard and Risk Assessment

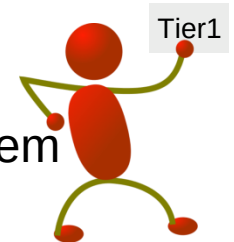

2. Define & Analyze

FSC

Functional Safety Concept

3. Browse FSC

4. Analyze Subsystem

5. Browse Subsystem

6. Collect Safety Case

Collaborative Dependability

Role: OEM
Application: EATOP
Content: Analysis Level Information

1. Perform HARA

Hazard and Risk Assessment

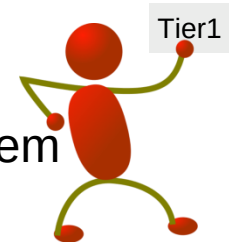

2. Define & Analyze

FSC

Functional Safety Concept

3. Browse FSC

4. Analyze Subsystem

5. Browse Subsystem

6. Collect Safety Case

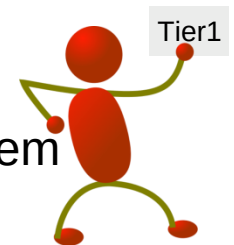

Collaborative Dependability

Role: Tier1
Application: EATOP
Content: Analysis Level information

1. Perform HARA
Hazard and Risk Assessment
2. Define & Analyze
FSC
Functional Safety Concept

3. Browse FSC
4. Analyze Subsystem

5. Browse Subsystem
6. Collect Safety Case

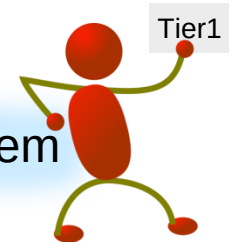

Collaborative Dependability

Role: Tier1
Application: EATOP
Content: Analysis Level information

1. Perform HARA
Hazard and Risk Assessment
2. Define & Analyze
FSC
Functional Safety Concept

3. Browse FSC
4. Analyze Subsystem

5. Browse Subsystem
6. Collect Safety Case

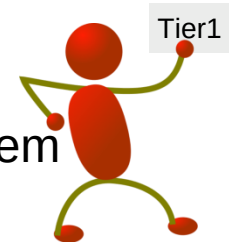

Collaborative Dependability

Role: OEM
Application: EATOP
Content: Annotated System Model

1. Perform HARA
Hazard and Risk Assessment
2. Define & Analyze
FSC
Functional Safety Concept

3. Browse FSC
4. Analyze Subsystem

5. Browse Subsystem
6. Collect Safety Case

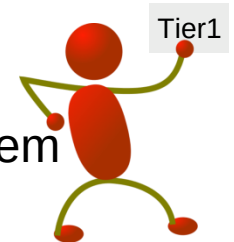

Collaborative Dependability

Role: OEM
Application: EATOP
Content: Annotated System Model

1. Perform HARA
Hazard and Risk Assessment
2. Define & Analyze
FSC
Functional Safety Concept

3. Browse FSC
4. Analyze Subsystem

5. Browse Subsystem
6. Collect Safety Case
